

Insurance-related questions to ask your eye care provider.

Are you an approved provider for my particular vision care insurance plan? Are any vision problems I'm experiencing considered a medical condition that should be filed under my medical insurance rather than my vision insurance? Do I file the claim with my insurers or will your office? Am I limited to only certain types of frames and lenses in order to be covered by insurance? Does my insurance plan cover multiple pairs of glasses, such as prescription glasses and prescription sunglasses? Notes: When should I schedule my next office visit, and how many visits does my insurance cover annually? Does insurance cover my needs or my child's needs for prescription protective eyewear for the sports or activities we engage in?
