in the optical industry

## Your vision matters, and so do the people who help protect it!

The optical industry offers a wide range of careers that allow you to make a difference in people's lives by helping them see clearly and maintain healthy eyes. Whether you're thinking about your future, exploring career options, or considering a career change, the optical industry has opportunities for you.

### Why Choose a Career in the Optical Industry?

- **Make an Impact:** Help people of all ages protect and improve their vision.
- **Job Stability:** Eye care is always in demand, and the industry continues to grow.
- **Exciting Career Paths:** From patient care to cutting-edge technology, there's something for everyone.
- **Opportunities for Growth:** Careers in the optical field offer room for advancement and specialization.

## Careers in the Optical Industry

### Optometrists

- Diagnose vision problems and eye diseases.
- Prescribe glasses, contact lenses, and treatments.
- Require a Doctor of Optometry (OD) degree.
- Work for corporate practices or start your own.

### Ophthalmologists

- Medical doctors who specialize in eye surgery and advanced eye care.
- Treat conditions like cataracts, glaucoma, and macular degeneration.
- Require a medical degree and specialized training.

### Opticians

- Help fit and dispense glasses and contact lenses based on prescriptions.
- Work in optical stores, clinics, and labs.
- Training programs and certifications available to start quickly.

### Technicians & Assistants

- Assist optometrists and ophthalmologists with eye exams and procedures.
- Work with imaging technology and diagnostic tools.
- On-the-job training and certifications can help you get started.

### Manufacturing & Research

- Develop and design new eyewear, lenses, and vision technology.
- Work in labs to improve vision solutions and medical treatments.
- Roles for engineers, designers, and scientists.
